SKILLS

Languages: C#, C++, HTML/CSS, JavaScript, Java, Python

Frameworks/Tools: Unity, Unreal 5, React, Git, Max

EXPERIENCE

- Software Developer, Project Lead** – UBC Emerging Media Lab Feb 2026 – Aug 2026
- Develop educational tools using emerging technologies such as VR and AI
 - Lead project planning and development efforts for a multidisciplinary team, managing priorities, milestones, and stakeholder communication.
- Programmer and Level Designer** – Nicknation Games Nov 2025 – Aug 2026
- Collaborate with a Hong Kong-based indie development team on an upcoming top-down 3D roguelike action game.
- Programmer** – Eternal Blaze Studio Oct 2025 – Jun 2026
- Assist in the development of a 3D co-op horror cooking game, including work toward a Steam demo and planned July 2026 release

PROJECTS

Another Order: Procedural Poetry Funhouse

- Led a team of 2 developers and 1 designer on a \$100K-funded VR project using AI and play-based learning to transform poetry into immersive educational experiences.
- Presented project progress to UBC stakeholders at a campus-wide emerging technologies showcase.

EPISODE: Enhanced Practice for Integrated Simulation of Drug-Related Encounters

- Built text-to-speech and speech-to-text features using **React**, **AWS Polly**, and **AWS Transcribe**
- Implemented a QR-code verification system for validating patient and medication data in healthcare simulation environments.

Death Kitchen

- Integrated and optimized post-processing profiles, volumetric lighting, and skybox settings to enhance environmental realism in **Unity**.
- Revamped the user interface using **Unity's uGUI** system to improve usability and visual consistency.

Sicarius

- Developed the boss character "Arctic" and multiple enemies in **Unity** using **C#**, including combat mechanics, attacks, and level design.
- Fixed gameplay bugs and collaborated with an international development team using **Git + Unity**

The Pianist

- Created interactive visuals using Kinect-tracked dancer movements to control a piano asset and a custom particle system using **Max** with **Unity**.

EDUCATION

- University of British Columbia** Sep 2021 – May 2026
- Bachelor in Cognitive Systems with an Applied Music Technology Minor

CERTIFICATIONS

- Unity Creative Core Pathway** Obtained Feb 2026
- Unity Junior Programmer Pathway** Obtained Oct 2025
- Unity Essentials Pathway** Obtained Jul 2025
